GENERAL INFORMATION

CHEMPRO CP-20 is a water-conditioning agent, that is formulated to enhance pesticidal performance. Hard water cations and high pH can decrease mixability and solubility of certain pesticides, especially Glyphosates, 2,4-D Amines and Garlon salts. Ammonium Sulfate has long been recognized to aid in the effective uptake of certain pesticides by some plant species. CHEMPRO CP-20 contains ammonium sulfate as well as acidifying, buffering and chelating agents which aid in maintaining the right pH in the tank mix solution and block hard water cations from interacting with the pesticide molecule.
